

Internal forest roads upgraded to a allow haulage of timber. Further roads will need to be constructed in order to give access to all areas of the forest.

Bailey Bridge upgraded to allow access by 44t vehicles

It is accepted that work is required to the public road before timber haulage will commence on the U2829. Once a LTFF is in place further discussions over STTS funding will take place. Open dialogue has been ongoing with Highland Council and Highland Timber Transport Group since 2018 in order to help provide a manageable program of upgrade and maintenance.
